

# viaAPP

Mobile app for viasis speed displays and viacount II · mobile and independent

Android  
app

Bluetooth  
connection

On-site  
evaluation

## TECHNICAL FEATURES

### Description

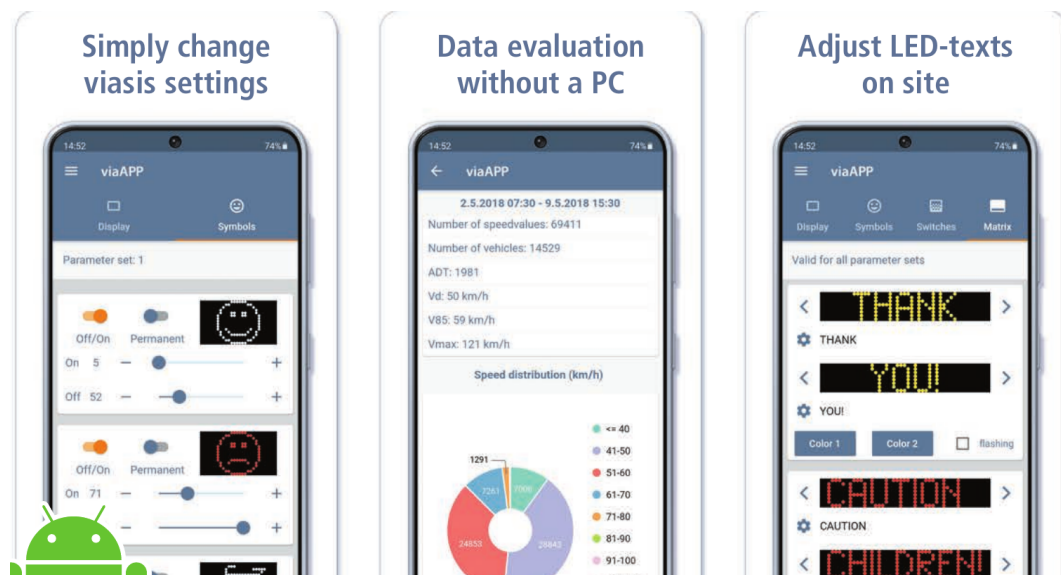

Change viasis or viacount II settings, read out measurement data or even create evaluations on site, without a PC. Simply install the viaAPP on your smartphone or tablet and connect to the device via Bluetooth. All viasis settings can be made with a click and slide control and transferred to the device.

### APP FEATURES

|                 |                                                                                          |
|-----------------|------------------------------------------------------------------------------------------|
| Device settings | Change all viasis settings with click and slide controls and transfer them to the device |
