TECHNICAL FEATURES

Online
access

Online data
evaluation

Remote
maintenance

Description

Make your viasis speed displays even smarter with the web-based viacloud. With an optional modem, the viasis device becomes part of the viacloud, giving you worldwide secure online access to your displays around the clock: location overview, web-based data evaluation, configuration in seconds and remote maintenance, from any PC or tablet.

ONLINE ACCESS & EVALUATION

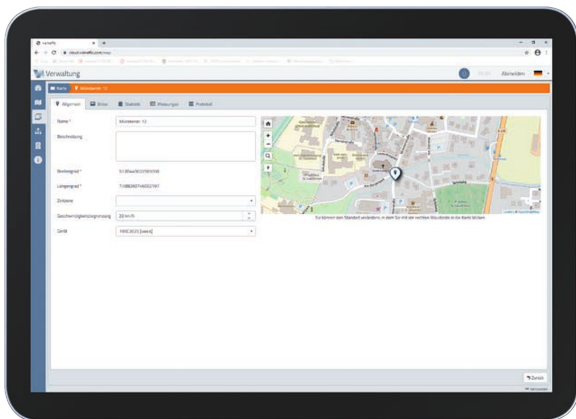

Access	Worldwide secure online access to your viasis around the clock
Map overview	All device locations on a map
Data evaluation	Web-based data evaluation and analysis (e.g. average speed, Vmax, V85)
Historical data	Access to historical data via the database
Data storage	Automatic storage of data on the server
Real-time data	Real-time data transmission

REMOTE CONTROL & MAINTENANCE

Configuration	Configuration in seconds
Device information	Battery voltage, GPS position, etc.
Location management	Yes
Remote maintenance	Firmware update / remote maintenance

COMPATIBILITY & REQUIREMENTS

Supported devices	viasis speed displays with the optional 4G modem + GPS + SIM card
Client	PC or tablet with web browser, no software installation required

Location, statistics and configuration in the browser.
